Art Unit: 1634

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 20-32, drawn to nucleic acids encoding SEQ ID NO: 2 (*i.e.*, protein EZH2), vectors, methods for producing vectors, transformed host cells, and methods for producing polypeptides of SEQ ID NO: 2.

Group II, claim(s) 33-45, drawn to nucleic acids of SEQ ID NO: 5, vectors, methods for producing vectors, transformed host cells, and methods for producing polypeptides encoded by SEQ ID NO: 5 (*i.e.*, EZH1).

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: SEQ ID NO: 2 of Group I is encoded by SEQ ID NO: 1 among other nucleic acids. SEQ ID NO: 2 is EXH2 (see Figure 8). SEQ ID NO: 5 encodes EZH2 and differs significantly from SEQ ID NO: 1 (see the alignment in Figure 8). Thus, the two groups do not share a special technical feature. Prior art may be found and applied to Group I that may not be relevant for Group II. In addition, prior art may be found and applied to Group II that may not be relevant for Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1634

To search any two groups as outlined above would create an undue burden for the U.S. PTO because the searches of the non-patent literature are not only non-overlapping to any appreciable extent, but are also divergent in nature.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Martinell whose telephone number is (571) 272-0719. The examiner works a flexible schedule and can be reached by phone and voice mail. Alternatively, a request for a return telephone call may be e-mailed to james.martinell@uspto.gov. Since e-mail communications may not be secure, it is suggested that information in such requests be limited to name, phone number, and the best time to return the call.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla, can be reached on (571) 272-0735.
